by Bertram R. Crane & Roger M. Hossman

Have You A 'Best Seller'?

ADVANCED MANAGEMENT invites articles dealing with all phases of management in business and in industry.

Of special interest is material dealing with the practical application of management theory, written by practicing management men—case histories which give a down-to-earth account of methods used to apply some practical new development or idea, with details explaining how it was done and results of the experiment.

We feel certain that many S.A.M. members have material for articles which will be of great interest to our readers. We hope those who do will find the time to put their ideas on paper so that others may share their experiences. Also, our magazine, with a world wide readership of over 30,000, is a splendid showcase for new ideas.
